Explanation:

- ① The SIM cards are activated but are supplied locked with roaming deactivated and can be unlocked in the mdex Management Portal. This does not apply to the mdex EASY SIM (KPN). These SIM cards are ready for roaming immediately after activation (see MNO country list). Further price details as well as a detailed description of the mdex SIM service can be found at <https://www.mdex.de/service/downloads/> (German).
- ② With 'flat rate' data tariffs, the transmission speed is reduced to 64 kbit/s after the booked data tariff has been used up. Additional data volume is not charged. Data rounding: 100 KB
With 'data packet' tariffs, the transmission speed is not reduced after the booked data tariff has been used up. Every further data packet used will be charged according to the monthly fees.
Data rounding: 10 KB
- ③ With 'data package' data plans, the transfer rate will not be throttled upon reaching the booked data plan. Every further started data package will be charged in full, based on the monthly fees.
Data rounding : 10 KB
- ④ With 'run-on-rate' data tariffs, the transmission speed is not reduced after consumption of the booked data tariff. After consumption of the data tariff, additional costs are incurred for each additional MB.
Data rounding: 1 KB
- ⑤ Monthly prices are payable 12 months in advance.
- ⑥ With the mdex EASY SIM (KPN), the MTU must be set to 1120 bytes in the mobile device. You will find further information on this [hier](#)
- ⑦ mdex SIM Telefonica connects to the German mobile networks Telefonica, Telekom throughout Germany depending on availability.
- ⑧ The data rounding is calculated by rounding off once every PDP context, once per CDR, and / or once to the nearest whole KB every 24 hours, if at least 1 data byte is passed in the day.
Data rounding : 1 KB
- ⑨ The available inclusive data volume of the individual mobile phone contracts is summarized in the so-called data pooling per pooling tariff, i.e. the sum of all data tariffs per customer and per tariff. Unused inclusive data volume is not carried over to the following billing month and therefore expires at the end of the billing month. If the agreed total inclusive data volume in the pool of the respective pooling tariff is exceeded, the excess data volume is billed for each additional MB (run-on rate).
Example: 10 mdex SIMs in the 3 MB pooling tariff result in a data pool of 30 MB. This total data volume can be transferred via the 10 mdex SIM as required.
- ⑩ mdex EASY SIM (KPN) connects to the German mobile networks Telekom, Vodafone, Telefonica throughout Germany, depending on availability.
- ⑪ mdex EASY SIM (KPN) with a contract term of 1 month can be terminated with 14 days' notice to the end of the month. Otherwise, the contract is extended by a further month. Cancellation must be in writing.
- ⑫ If you choose mdex public.IP, we recommend a data volume of 5 GB or more. Please also note our security information at <https://wiki.mdex.de/Support/QNASicherheitshinweise>.
Our sales department will be happy to advise you on the optimum SIM card tariff for your application.
- ⑬ mdex PRO PACKAGE includes the pre-configuration of the router, a German quick-start guide, German-language support and 20 minutes of set-up support (20 min. set-up support free of charge within the first 6 months after purchase, or the first day of rental).
